

## ***Town Council Meeting Action Items – March 19, 2025***

- The Town Council participated in the ribbon cutting ceremony for the Innsbruck Lodge Affordable Housing project located at 913 Forest Trail.
- Public Hearing: Town Council approved District Zoning Amendment 24-001, Use Permit 24-004, and Tentative Tract Map 24-003 for a subsequent amendment to the Amended Phase One Clearwater Specific Plan (CSP) located at 164 Old Mammoth Road. Town Council approved the Tentative Tract Map for the subdivision of 20 units within the five four-plex structures ("Villas") into condominium hotel units that may be sold individually.
- Town Council received a presentation on suggested updates to Town staffing and provided consensus to staff on recommendations.
- Town Council received the second quarter Fiscal Year 2024-25 Budget Report and adopted the resolution amending the Fiscal Year 2024-25 budget as recommended in Attachment A. Allocations were made to the Tourism, Transit and Housing reserves, including Phase III of The Parcel, CRC interior improvements, road maintenance, parks and recreation master planning, wildfire mitigation, roundabout design, Whitmore Ball field # 3 rehabilitation and funding for wildfire mitigation work in the Knolls area managed by the Whitebark Institute as part of the [Eastern Sierra Climate and Communities Resilience Project](#).
- Town Council approved a merit pay adjustment of 5% for the Town Manager resulting in an annual wage of \$219,558.
- Town Council adopted a resolution opposing federal funding and staffing cuts that will have negative local impacts to forest health and wildfire mitigation along with local economic and social impacts.

## ***Town Council Adopts Updated Snow Management Policy***

- As you might imagine, snow management in a town like Mammoth Lakes is no small undertaking. Precise coordination, reliable crews and a solid plan are all needed to clear roadways, sidewalks and multi-use paths after winter storms.
- Recently the Town updated its snow management policy to reflect the changes that have occurred in our community since the plan was last updated in 2006. Infrastructure (and the amount of available snow storage space) and staffing play huge roles in the efficiency of the snow removal process.
- With 120 lane miles of roads and 7.4 miles of sidewalk to manage, snow operators have their work cut out for them after every storm. They follow a specific plan and road clearing order based on the severity of the storm. Public safety and support for emergency services are always set as top priorities.
- Each snow event is categorized as either Typical Operations, Reduced or Significantly Delayed Operations or Emergency Operations. While most snow events fall into the first category, there are times when snowfall exceeds the ability of the Town crews to successfully perform typical operations throughout town and adjustments must be made for categories two and three.
- The goal of the Snow Management Policy is to provide the safest possible movement of vehicle and pedestrian traffic throughout the community during winter months and intense storm periods.
- To learn more about the entire process, check out the newly updated policy [here](#).
