RESOLUTION NO. PEDC 2017-14

**A RESOLUTION OF THE MAMMOTH LAKES PLANNING AND
ECONOMIC DEVELOPMENT COMMISSION
APPROVING TENTATIVE TRACT MAP 17-001,
DESIGN REVIEW 15-001A, AND ADJUSTMENT 17-007
TO ALLOW THE AMENDED MOUNTAINSIDE PROJECT
FOR PROPERTY LOCATED AT 413 RAINBOW LANE.
(APN: 031-190-002-000)**

WHEREAS, a request for consideration of a tentative tract map, amended design review, and adjustment permit were filed by John Hooper to allow a 16-unit townhome project (Mountainside), in accordance with Section 17.20 (Residential Zoning Districts), 17.76 (Adjustments), and 17.88 (Design Review) of the Town of Mammoth Lakes Municipal Code, for property located within the Residential Multi-Family 2 (RMF-2) Zoning District at 413 Rainbow Lane; and

WHEREAS, the Planning and Economic Development Commission noticed a public hearing for July 12, 2017, which was continued to August 9, 2017, at which time all those desiring to be heard were heard; and

WHEREAS, the Planning and Economic Development Commission considered, without limitation:

1. The staff report to the Planning and Economic Development Commission with exhibits;
2. The General Plan, State Subdivision Map Act, Municipal Code, Design Review Guidelines, Subdivision Ordinance, and associated Land Use Maps;
3. Oral evidence submitted at the hearing;

4. Written evidence submitted at the hearing; and
5. Project plans consisting of:
 - a. Tentative Tract Map 17-001 Sheets 1 – 4, dated August 2, 2017; and
 - b. Example (Building A) Elevation Revisions – Sheets A3.1, A3.2, and A3.3 dated November 30, 2016.

NOW THEREFORE, THE PLANNING AND ECONOMIC DEVELOPMENT COMMISSION OF THE TOWN OF MAMMOTH LAKES DOES RESOLVE, DETERMINE, FIND AND ORDER AS FOLLOWS:

SECTION 1. FINDINGS.

1. **CEQA.** The project is categorically exempt pursuant to CEQA Guidelines Section 15332, In-Fill Development Projects, because the following criteria are met:

- a. The project is consistent with the General Plan because the project is consistent with the High Density Residential 2 (HDR-2) designation since the project is a multi-unit townhouse development at a density of 9.6 units per acre, which is below the maximum allowable density of 12 units per acre. Additionally, the project provides a high quality townhome product available for nightly rentals in an appropriate location, the design respects the natural environment by preserving the steeply sloped portion of the lot, the architecture and building exteriors are appropriate to the Eastern Sierra, building height would remain below tree heights on the site, and pedestrian connectivity is provided (General Plan Policies C.2.L, C.2.N, C.2.T, C.2.V, C.2.X, C.4.C, L.3.A, L.5.B, L.5.C, and S.3.H).

The project is consistent with the Zoning Code because the project complies with all applicable regulations for the Residential Multi-Family 2 (RMF-2) Zone, including but not limited to density, lot coverage, snow storage, parking, solid waste/recycling, and specific land use regulations identified in Municipal Code Section 17.52.210. The variance and adjustment requests that have been granted and that are a part of this current request are allowed pursuant to Chapters 17.72 and 17.76 of the Zoning Code.

- b. The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses because the project site is within the Town's Urban Growth Boundary, the site is approximately 1.67 acres, and the site is surrounded by condominium developments and a parking lot.
- c. The project site has no value as habitat for endangered, rare, or threatened species because a biological resources assessment for the project site dated April 3, 2015 and prepared by Dr. Jim Paulus, documents that the site has no value as habitat for endangered, rare, or threatened species.
- d. Approval of the project would not result in any significant effects related to traffic, noise, air quality, or water quality since the project is below the

maximum density allowed for the site, the project conforms or is required to conform to Municipal Code standards for noise, air quality and lot coverage, the project conforms or is required to Public Works standards for improvements, parking, driveways, and storm drain systems, and the project will be required to obtain necessary permits for construction, including a National Pollutant Discharge Elimination System (NPDES) permit.

- e. The site can be adequately served by all required utilities and public services because all necessary utilities and services are currently provided or can be extended to the site. The plans were routed to Mammoth Community Water District (MCWD), the Mammoth Lakes Fire Protection District (MLFPD), Amerigas, Mammoth Disposal, Southern California Edison (SCE), and the United States Forest Service (USFS), and all comments received have been incorporated into the project and/or conditions of approval. Additionally, at time of building permit, development impact fees (DIF) will be paid.

2. SUBDIVISION MAP ACT FINDINGS. (State Map Act Section 66474)

- a. The proposed map is consistent with applicable General and Specific Plans as specified in Section 65451 of the Subdivision Map Act because the project is consistent with the High Density Residential 2 (HDR-2) designation since the project is a multi-unit townhouse development at a density of 9.6 units per acre, which is below the maximum allowable density of 12 units per acre. Additionally, the project complies with the General Plan Vision, goals, and policies, including that the project provides a high quality townhome product available for nightly rentals in an appropriate location, the design respects the natural environment by preserving the steeply sloped portion of the lot, the architecture and building exteriors are appropriate to the Eastern Sierra, building height would remain below tree heights on the site, and pedestrian connectivity is provided (General Plan Policies C.2.L, C.2.N, C.2.T, C.2.V, C.2.X, C.4.C, L.3.A, L.5.B, L.5.C, and S.3.H). There is no applicable specific plan.
- b. The Trail System Master Plan (TSMP) shows a “long-term sidewalk” along Rainbow Lane. The TSMP describes that the sidewalk recommendations included in the TSMP should be considered in future mobility planning efforts (e.g., Pedestrian Master Plan and Mobility Plan/Element). The 2014 Pedestrian Master Plan and the current draft Mobility Plan/Element do not show a sidewalk along Rainbow Lane. Therefore, this project is not required to construct a sidewalk along Rainbow Lane.
- c. The design and improvements of the subdivision are consistent with applicable general and specific plans because the project complies with Municipal Code development standards such as density, parking, lot coverage, and snow storage, which implement the goals and policies of the Town of Mammoth Lakes General Plan. Furthermore, the project complies and is conditioned to comply with all Public Works standards for all improvements. The property is not located within a specific plan area.

- d. The site is physically suitable for the type of development because the project complies with density standards while preserving the steeply sloped portion of the lot. A reduced setback and increased building height, approved through a variance and adjustment, are allowed by state law and the Municipal Code.
- e. The site is physically suitable for the proposed density of development because the density proposed is 9.6 units per acre and a maximum of 12 units per acre is permitted. A reduced setback and increased building height, approved through a variance and adjustment, are allowed by state law and the Municipal Code.
- f. The design of the subdivision and the proposed improvements are not likely to cause substantial environmental damage nor substantially injure fish or wildlife or their habitat since the property is not located within an environmentally sensitive area and is Categorically Exempt from environmental review pursuant to Section 15332, In-Fill Development Projects, of the California Environmental Quality Act (CEQA) Guidelines.
- g. The design of the subdivision and the types of improvements is not likely to cause serious public health problems since no evidence has been submitted during the planning review process to indicate that the development would cause any serious public health problems. All necessary public services are currently provided, or can be extended to, the site to assure health and safety for those individuals occupying and using the site facilities. Grading and building permits will be obtained to ensure all applicable health and safety requirements are complied with.
- h. That the design of the subdivision and the type of improvements will not conflict with easements, acquired by the public at large, for access through or use of, property within the proposed subdivision since all easements are shown on the tentative tract map and the property has access to a public street with approved street alignments and widths. All utilities, and their easements, are currently in place on, or can be extended to, the property and the proposed subdivision will not impact upon adjacent property easements and/or common areas shared among condominium owners.

3. MUNICIPAL CODE FINDINGS.

FINDINGS FOR DESIGN REVIEW PERMIT

(Municipal Code Section 17.88.060)

- a. The proposed project is consistent with the applicable standards and requirements of the Mammoth Lakes Zoning Code because the project complies and is conditioned to comply with all applicable regulations for the Residential Multi-Family 2 (RMF-2) Zone, including but not limited to density, lot coverage, snow storage, parking, solid waste/recycling, and specific land use regulations identified in Municipal Code Section 17.52.210. The variance and

adjustment requests that have been granted and that are a part of this current request are allowed pursuant to Chapters 17.72 and 17.76 of the Zoning Code.

- b. The proposed project is consistent with the General Plan and any applicable specific plan or master plan because the project is consistent with the High Density Residential 2 (HDR-2) designation since the project is a multi-unit townhouse development at a density of 9.6 units per acre, which is below the maximum allowable density of 12 units per acre. Additionally, the project provides a high quality townhome product available for nightly rentals in an appropriate location, the design respects the natural environment by preserving the steeply sloped portion of the lot, the architecture and building exteriors are appropriate to the Eastern Sierra, building height would remain below tree heights on the site, and pedestrian connectivity is provided (General Plan Policies C.2.L, C.2.N, C.2.T, C.2.V, C.2.X, C.4.C, L.3.A, L.5.B, L.5.C, and S.3.H). There is no applicable specific plan or master plan.
- c. The proposed project is consistent with the Town of Mammoth Lakes Design Guidelines and any applicable design guidelines adopted by the Town Council because natural site features are recognized by locating buildings away from the steepest portion of the site; grading is reduced as a result of the variance to reduce the front yard setback; parking areas are screened from the street; landscaping includes plants recommended for Mammoth Lakes; building forms, roofs, and facades provide variation and visual interest; a clear building base is provided; and materials and colors are appropriate for the neighborhood, natural environment, and Mammoth Lakes.
- d. The site design and building design elements, including architectural style, size, design quality, use of building materials, and similar elements, combine together in an attractive and visually cohesive manner that is compatible with and complements the desired architectural character and/or aesthetic character of the area and a mountain resort community, encourages increased pedestrian activity, and promotes compatibility among neighboring uses because the buildings' architecture and exterior treatment are of high quality that is complementary to a mountain environment and the neighborhood. The building massing is similar to projects in the vicinity and zoning district. The project includes a pedestrian walkway that connects the west portion of the site to Rainbow Lane.
- e. The design of streetscapes, including street trees, lighting, and pedestrian furniture, is consistent with the character of commercial districts and nearby residential neighborhoods because the project includes landscaping in the front yard that consists of plantings appropriate to Mammoth Lakes. The project is not located in a commercial district and does not require the installation of street trees, street lighting, or pedestrian furniture, which is consistent with the surrounding residential neighborhoods. The project includes a pedestrian walkway that provides a separate pedestrian connection to Rainbow Lane.
- f. Parking areas are located, designed and developed to foster an implement the planned mobility system for the area; buffer surrounding land uses; minimize

visibility; prevent conflicts between vehicles and pedestrians and cyclists; minimize stormwater run-off and the heat-island effect; and achieve a safe, efficient, and harmonious development because parking is screened from the street by buildings, retaining walls, and landscaping. The project driveway meets Public Works standards, which will minimize conflicts between vehicles and pedestrians and cyclists. Also, the project is 13% below the maximum allowable lot coverage and includes the installation of necessary storm drain infrastructure.

- g. Down-directed and shielded lighting and lighting fixtures are designed to complement buildings, be of appropriate scale, provide adequate light over walkways and parking areas to create a sense of pedestrian safety, minimize light pollution and trespass, and avoid creating glare because the project lighting will comply with the Town's Outdoor Lighting regulations.
- h. Landscaping is designed to conserve water resources, promotes a natural aesthetic, and be compatible with and enhance the architectural character and features of the buildings on site, and help relate the building to the surrounding landscape because the landscaping consists of species that are drought tolerant and appropriate to Mammoth Lakes, and the preliminary landscape plan reflects snow storage areas and the proposed site and building design. Conditions of Approval require landscaping with minimal water requirements consistent with State mandates.
- i. The proposed project is consistent with any approved tentative map, use permit, variance, or other planning or zoning approval that the project required because the design review permit is being processed concurrently with the tentative tract map and adjustment, and there are previously approved permits for a variance, adjustment, and use permit, and therefore, will be consistent.

FINDINGS FOR ADJUSTMENT

(Municipal Code Section 17.76.040)

- a. The Adjustment requests a decrease of not more than 20% of the required west side yard setback (facing Lakeview Boulevard and Canyon Lodge) to allow for a reduced setback for the construction of the 16-unit townhome project. This request is an allowed Adjustment pursuant to Municipal Code Section 17.76.020.
- b. The Adjustment will result in a significant public benefit because it will provide improved snow storage for the 16-unit townhome project. Due to the Adjustment for increased distances between the buildings and the removal of the side pop-outs on Lots 3, 4, 5, 6, 7, 8, 14, and 15, the building separation distances will be approximately 13 ½ to 16 feet, depending on the adjacent lots. This will allow for the passage of snow removal equipment between buildings and improved snow storage management. The increased distances between the buildings shifts the entire project two feet to the west, requiring an Adjustment

to the 10-foot setback along the property line facing Lakeview Boulevard. The approval of the Adjustment will allow for an eight-foot side yard setback.

SECTION 2. PLANNING AND ECONOMIC DEVELOPMENT COMMISSION ACTIONS. The Planning and Economic Development Commission hereby takes the following actions:

1. Finds that this project is categorically exempt pursuant to Section 15332, In-Fill Development Projects, of the California Environmental Quality Act (CEQA) Guidelines;
2. Approves Tentative Tract Map 17-001, Design Review 15-001A, and Adjustment 17-007 subject to the following conditions:

(SEE ATTACHMENT "A"); and

3. Directs staff to file a Notice of Exemption.

PASSED AND ADOPTED this 9th day of August 2017, by the following vote, to wit:

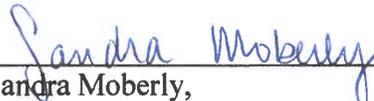

AYES: Callanan, Vanderhurst, Chang, Burrows, Eckert

NAYS:

ABSENT:

ABSTAIN:

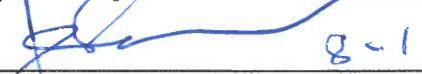

ATTEST:

 Sandra Moberly,
 Community and Economic Development
 Manager

 Amy Callanan,
 Chair of the Planning and
 Economic Development Commission

NOTE: This action is subject to Chapter 17.104 of the Municipal Code, which specifies time limits for legal challenges.

I, John Hooper of Mountainside One, LLC am the property owner and applicant for this project request and I do hereby attest that I have read, and agree to, the conditions of approval stipulated within this Resolution.

ATTACHMENT "A"
Resolution No. PEDC 2017-14
Case No. TTM 17-001, DR 15-001A, ADJ 17-007

PLANNING DIVISION CONDITIONS

STANDARD PLANNING CONDITIONS

1. This approval authorizes the following: A 16-unit townhome project, Mountainside, located at 413 Rainbow Lane. An amended design review is approved to remove the side pop-outs on Lots 3, 4, 5, 6, 7, 8, 14, and 15. An adjustment is approved to reduce the west side yard setback to eight feet.
2. Lot 1 building area and associated access and parking shall remain available for snow storage and in a stabilized, graded, permeable condition satisfactory to the Public Works Department (and otherwise unimproved) until such a time that a snow storage area plan is provided for the entire project, Lots 1 – 16, in accordance with the Municipal Code and approved by the Town of Mammoth Lakes Community and Economic Development Department. No building permit shall be issued for Lot 1 prior to such approval of a snow storage area plan. At such time that a snow storage area plan is approved, and prior to the construction of Lot 1, the dumpster will be moved to the west side yard setback area. Lot 1, while used for snow storage, may not be used for parking. If an approved snow storage area plan and Certificate of Occupancy for Lot 1 are not issued within three years of the approval of the Final Map, the Lot 1 building area and associated access and parking shall be restored with native vegetation to a condition satisfactory to the Public Works and Community and Economic Development Departments.
3. This permit and all rights hereunder shall automatically terminate unless the business operation, site preparation or construction has been commenced within two years after the issuance of this permit and such work is diligently carried on until completion, or an extension of time has been granted in accordance with Municipal Code Section 17.64.060.B.
4. All new improvements constructed on the site shall be in compliance with all Town of Mammoth Lakes, County of Mono, Mammoth Community Water District, the Mammoth Lakes Fire Protection District, the CRWQCB Lahontan District, Great Basin Air Pollution Control District, OSHA, State of California and United States of America laws, statutes, ordinances, regulations, directives, orders, and the like applicable thereto and in force at the time thereof. Any violation of the above may constitute grounds for revocation of the use permit under Chapter 17.128 of the Mammoth Lakes Municipal Code.
5. This resolution of approval, as conditioned herein, shall be recorded for the subject property by the Mono County Recorder's Office to commence the approved use on the property or the issuance of any building permits for new or remodeled structures.
6. The site shall be maintained in a neat, clean and orderly manner. All improvements shall be maintained in a condition of good repair and appearance. Outdoor storage of equipment and other materials, except for firewood, is prohibited. Non-operating vehicles, equipment and materials inappropriate to the site and its use shall not be stored within outdoor areas

on the site.

7. Storage of construction materials and equipment off-site shall not be permitted without a permit issued by the Community and Economic Development Department of the Town. Any public or private property altered, damaged or destroyed by site preparation, grading, construction or use shall be restored to its pre-existing condition by the permittee.
8. All conditions of this use permit shall be met or secured prior to final occupancy approval of any tenant improvements or new structures.
9. All uses are subject to review by the Building Official of the Town of Mammoth Lakes and must conform to occupancy ratings of the structures to obtain occupancy.
10. Town staff shall have the right to enter the subject property to verify compliance with these conditions. The holder of any permit associated with this project shall make the premises available to Town staff during regular business and shall, upon request, make records and documents available to Town staff as necessary to evidence compliance with the terms and conditions of the permit.
11. Prior to the issuance of a building permit, the applicant shall pay Development Impact Fees as prescribed by ordinance and/or resolution and pay any fees due on this project processing account.
12. Where compliance with the conditions of approval or applicant initiated changes to the plans require additional staff review, that review time shall be billed at the Town's established billing rates. Prior to the issuance of a building or grading permit, the applicant shall pay all outstanding costs for the processing of this application.
13. The approved site and building plans shall be adhered to and maintained for the duration of the permit.
14. This action may be appealed to the Town Council within fifteen (15) calendar days from the date of Planning and Economic Development Commission approval in accordance with Municipal Code Chapter 17.104.
15. Prior to receipt of a grading or building permit, the applicant shall obtain a secondary source permit or letter of exemption from the Great Basin Unified Air Pollution Control District.
16. The applicant shall defend, indemnify, and hold harmless the Town and its agents, officers, and employees from any claim, action, or proceeding against the Town and its agents, officers, or employees to attack, set aside, void, or annul, an approval of the Town, advisory agency, appeal board, or legislative body concerning this approval. The Town shall promptly notify the applicant of any claim, action, or proceeding and shall cooperate fully in the defense.
17. Pursuant to Government Code Section 66474.9 the subdivider shall defend, indemnify, and hold harmless the Town and its agents, officers, and employees from any claim, action, or proceeding against the Town and its agents, officers, or employees to attack, set aside, void, or annul, an approval of the Town, advisory agency, appeal board, or

legislative body concerning this approval, which action is brought within the time period provided for in Government Code Section 66499.37. The Town shall promptly notify the subdivider of any claim, action, or proceeding and shall cooperate fully in the defense.

18. In consideration of the Town's Vision Statement requiring a de-emphasis of the use of the automobile, occupancy and mode of travel expectations and to mitigate the impacts of the project on air quality as required by CEQA, the applicant and the owners association, if formed, shall submit a petition to be annexed into the Transit and Transportation Fee Community Facility District (CFD 2013-03) and pay all fees associated with the annexation process prior to final map approval by staff. CFD 2013-03 shall be referenced in the project CC&Rs, as well as in any disclosure documents required by the California Department of Real Estate for the project.
19. The trash enclosure shall be improved with a concrete slab and constructed of masonry with an exterior of stone veneer or other materials compatible with that of the buildings. Adequate space for recyclable materials shall be provided within the enclosure. All trash enclosures, receptacles, and food storage areas shall be animal resistant. The enclosure is not required to be gated.
20. All exterior lighting shall comply with Chapter 17.36.030 of the Town of Mammoth Lakes Municipal Code, Exterior Lighting. Exterior light fixtures having a total of over 400 lumens of output shall be equipped with shields that extend below the horizontal plane of the light source to direct the light downward onto the structure or surrounding grounds.
21. The project shall meet the requirements of Municipal Code Chapter 17.40 (Water Efficient Landscape Regulations) including the Landscape Documentation Package. A final landscape and irrigation plan shall be submitted to, and approved by, the Community and Economic Development Department for inclusion in the project grading permit. Where no grading permit is required, the final landscape plan must be submitted to and approved by the Town prior to issuance of a building permit. Said landscape and irrigation plan shall substantially conform to the preliminary landscape plan reviewed and approved by the Planning and Economic Development Commission. All landscape plantings shall be maintained in a healthy and growing condition at all times (as applicable for the season) and individual plants shall be replaced if they become diseased or die. An automated irrigation system shall be provided for each landscape area. The irrigation equipment and system shall be maintained in a proper working condition at all times. Landscaping and irrigation systems within the public right-of-way within or adjacent to the project area shall be maintained by the property owner, with the exception of benefit assessment district areas.
22. A tree removal plan shall be approved prior to any land disturbance and the issuance of a grading or building permit. A pre-construction meeting shall be held on-site prior to any land disturbance. The applicant shall obtain the necessary Timber Harvest Permit prior to any tree removal.
23. The project shall comply with the Guidelines for Erosion Control in the Mammoth area. This shall include submittal of a Report of Waste Discharge, if applicable.

24. The property owner shall execute a hold harmless agreement waiving any liability on the part of the Town for damage from snow removal or other standard street maintenance functions.
25. Water and sewer improvements require a construction permit from Mammoth Community Water District. Prior to the Town authorizing any construction, the applicant shall obtain water and sewer permits from Mammoth Community Water district and pay applicable fees to the District.
26. New or changed improvements, exterior illumination, elevations, designs, materials, or colors shall conform to the adopted Design Guidelines of the Town of Mammoth Lakes and will require review and approval from the Town of Mammoth Lakes Community and Economic Development Department or Planning and Economic Development Commission pursuant to Municipal Code Chapter 17.88.
27. A certificate of occupancy is required for all future tenant improvements within the subject structure. Tenant improvements shall identify occupancy separation requirements, disabled access requirements and compliance with all applicable building, electrical, plumbing, and fire code requirements.
28. Zoning entitlement conditions of approval shall be printed verbatim on all of the working drawing sets used for issuance of building permits (architectural, structural, electrical, mechanical, and plumbing) and shall be referenced in the index.
29. Roof vents, exhaust, pipes and flues shall be combined and/or collected together on slopes of roof out of public view to the greatest extent possible.
30. Retaining wall design and material(s) shall be reviewed by the Town prior to grading permit issuance.

SPECIAL PLANNING CONDITIONS

31. Prior to the issuance of each building permit for each of the seven duplex buildings, the applicant shall elect to pay either \$23,222 per unit (i.e., \$46,444 per duplex building permit) for a total project fee payment of \$325,108, or the current housing mitigation fee in effect at time of building permit issuance. This shall be ensured by the Community and Economic Development Department prior to building permit issuance.
32. The trash/recyclable materials enclosure shall be installed prior to the issuance of the third certificate of occupancy for the project. This shall be reviewed and approved by the Community and Economic Development Department.
33. Prior to the issuance of each building permit, the applicant shall pay the required public art fees. This shall be ensured by the Community and Economic Development Department prior to building permit issuance.
34. Roof eaves encroaching into setback areas shall be protected with snow restraint devices. This shall be reviewed and approved by the Community and Economic Development Department prior to issuance of a certificate of occupancy.

35. As shown on Tentative Tract Map 17-001, Lot 9 (Building A) and Lot 16 (Building C) shall not have any habitable area that encroaches into the east 10-foot side yard setback. This shall be reviewed and approved by the Community and Economic Development Department prior to building permit issuance.
36. The water supply and rough-in roadway system capable of supporting 75,000 pounds shall be in place prior to the delivery of combustible construction products. Due to the tight working area, the developer shall provide location(s) for staging area(s) of construction material and employee parking. This shall be reviewed and approved by the Mammoth Lakes Fire Protection District prior to grading permit issuance.
37. A key box shall be provided with an individual master key that provides access to each structure. This shall be reviewed and approved by the Mammoth Lakes Fire Protection District prior to building permit issuance.
38. A wildland fuels management plan, including fire hazard reduction analysis, shall be completed for the area between the proposed structures and the south property line. This shall be reviewed and approved by the Mammoth Lakes Fire Protection District prior to building permit issuance.
39. Condition of Approval 20, above, requires the final landscape and irrigation plan to substantially conform to the preliminary landscape plan approved by the Planning and Economic Development Commission; however, if substantial changes to the landscape plan are required to comply with new state regulations regarding water usage, those changes shall be reviewed and approved by the Community and Economic Development Department prior to building permit issuance.
40. The applicant shall terminate any lease or agreement that would conflict with the ability of the project to comply with the Municipal Code snow storage requirements prior to the issuance of a building permit. This shall be reviewed and approved by the Community and Economic Director prior to issuance of the first building permit.
41. The revised Building C north elevation, Sheet A3.2, dated April 30, 2015, is approved by the Planning and Economic Development Commission. The Community and Economic Development Department shall ensure that the building permit plans for Building C confirm to this revised elevation prior to issuance of a building permit for Building C.
42. The west elevation of Building D shall be revised to incorporate similar design features as shown on the revised Building C north elevation, Sheet A3.2, dated April 30, 2015. This shall be reviewed and approved by the Community and Economic Development Department prior to issuance of a building permit for Building D.

ENGINEERING DIVISION CONDITIONS

STANDARD CONDITIONS / GENERAL REQUIREMENTS:

43. A final map, consistent with the tentative map and the conditions herein, shall be recorded with the County Recorder of Mono County prior to the expiration of the approved tentative map. The final map shall conform to the Subdivision Map Act and

the Subdivision Ordinance for the Town of Mammoth Lakes. The tentative map shall expire 24 months after the approval date. Failure to record the final map prior to the expiration will nullify all approvals, except as such time limitation may be extended by law or by the Planning and Economic Development Commission in accordance with the Subdivision Map Act.

44. Copies of all exceptions, easements, restrictions and encumbrances listed in the preliminary title report together with a copy of the current grant deed and a current title report, a copy of each record map for the subject property shown within the tentative map boundary, and a copy of each and every adjacent map, deed or other document as necessary that establish, or were used for the survey of, and for the retracement of the subdivision boundary shall be submitted with the initial submittal of the final map. A subdivision guarantee shall be issued and dated within 30 days prior to final map approval by the Planning and Economic Development Commission.
45. The maintenance of graded slopes and landscaped areas shall be the responsibility of the developer until the transfer to individual ownership or until the maintenance is officially assumed by an approved maintenance district or property owners association.
46. Slope rights adjacent to public rights of way shall be dedicated on the final map where necessary.
47. All new utility lines within, adjacent to or serving the site shall be placed underground.
48. The site grading design and all building construction shall conform to State and federal disabled access regulations.
49. Paved access is required to a maintained street. Street and traffic signs shall meet the California Manual of Uniform Traffic Control Devices (MUTCD).
50. Landscaping and irrigation systems within the public right of way, adjacent to the project area and within the project shall be maintained by property owner, with the exception of benefit assessment district areas.
51. The applicant shall obtain an easement or letter of permission to grade all areas requiring off-site grading prior to issuance of a grading permit or a building permit. These areas shall be contour graded.
52. The applicant shall submit to the Town an electronic file of the final map in AutoCAD, or other format as may be approved by the Public Works Director, within 30 days of approval of the final map.
53. All easements and dedications shall be in a form and content acceptable to the Public Works Director.
54. Nothing in the approval of this tentative tract map shall be construed to allow for the deviation, adjustment, variance or non-conformance of any Municipal Code or ordinance, or of any local, State or federal standard, policy, regulation or law, unless specifically provided for herein.

55. All grading and public improvements shall be consistent with the Town of Mammoth Standard Plans for Public Works.
56. Any off-site improvements required, such as installation of roads, sewers, water lines, or drainage improvements, which are of benefit to land other than the land located within the subdivision, shall be subject to an approved agreement between the Town and the subdivider to reimburse him in whole or in part for the use of the improvement by lands other than those developed by the subdivider, pursuant to Section 17.16.190 of the subdivision ordinance.

THE FOLLOWING CONDITIONS SHALL BE COMPLETED PRIOR TO APPROVAL BY STAFF OF THE FINAL MAP:

57. The final map shall conform to the requirements of Town of Mammoth Lakes Ordinance 84-10 and all amendments thereto.
58. A preliminary soils report shall be filed with and reviewed by the Public Works Director. The report shall address and make recommendations as to the compacted and un-compacted fills on-site. A note shall be placed on the final map indicating which lots require grading remediation. An "as-graded" soils report shall be provided to the Town upon completion of the grading.
59. A form of security listed in Government Code Section 66499(a) and acceptable to the Town shall be posted to secure completion of all required grading, street and drainage improvements in accordance with the Municipal Code and the applicant shall enter into a subdivision improvement agreement for all required public improvements in accordance with the Subdivision Map Act. The agreement shall include provisions for the posting of warranty sureties for the accepted public improvements two weeks prior to Planning and Economic Development Commission approval of the final map. Construction cost estimates for all required sureties shall be prepared and signed by a registered civil engineer. The estimates shall be at prevailing wages and shall include 20% for construction contingencies and 20% for administrative costs. All sureties shall be posted prior to the issuance of a grading permit and prior to approval by staff of the final map.
60. A form of security listed in Government Code Section 66499(a) shall be posted with the Town in a form acceptable to the Town Surveyor for any deferred final monumentation for the final map. The estimated amount of the surety shall be prepared by the licensed land surveyor preparing the final map and shall be approved by the Town Surveyor.
61. Rights of way and improvements (including off-site) to transition traffic and drainage flows from proposed to existing shall be required as necessary.
62. All easements as shown on the tentative map shall be granted on the final map, or recorded by separate document prior to or concurrent with recordation of the final map in a form and in content acceptable to the Town. Easements to be recorded by separate document shall be submitted to the Town for review and approval. The fully executed documents shall be submitted to the Public Works Director prior to approval of the

final map. Easements shown on the tentative map to be granted or dedicated shall indicate the beneficiary of the easement(s).

63. Easements shown on the tentative map to the benefit of an agency other than the Town or to other parties shall be shown on the final map as "Easements Reserved". The owners statement on the parcel map shall reserve said easements unto themselves, their heirs and assigns.
64. All documents that are required to record prior to or concurrent with the recordation of the final map shall be reviewed and approved by the Town and shall be fully executed, notarized and ready for recordation prior to approval of the final map by town staff. The originals of the executed documents shall be delivered to the Public Works Director together with the final map prior to approval of the final map.
65. Monumentation of the subdivision shall be installed in accordance with the Subdivision Ordinance of the Town, Ordinance 84-10.
66. The CC&Rs shall contain provisions granting rights of access and parking, as necessary, to the owners, tenants, and their guests, of the condominium units.
67. Existing CC&Rs, if any, encumbering the property shall be amended as necessary for the proposed development of this project.
68. The applicant shall submit a request for unit, building and street addressing to the Town, and a request for street names for all streets within the subdivision. Approval of the addressing and street names shall be completed prior to approval of the map by staff.
69. For condominium projects the following statement shall appear on the signature sheet of the final map: "THIS SUBDIVISION IS A PLANNED DEVELOPMENT AS DEFINED IN SECTION 6562 OF THE CIVIL CODE OF THE STATE OF CALIFORNIA, CONTAINING A MAXIMUM 48 ROOMS WITHIN 16 UNITS AND IS FILED PURSUANT TO THE SUBDIVISION MAP ACT."
70. Prior to approval of the final map by staff, the applicant shall provide evidence to the Town that the property taxes have been pre-paid to Mono County Tax Collector or their payment has been secured by the filing of a surety bond or other cash-equivalent security acceptable to the County.
71. As required by the Town's Subdivision Ordinance Section 17.08.035 and Council Resolution 14-28, the applicant shall pay a fee for each unit, parcel or lot, including lettered lots and parcels and common area lots or parcels, created to the Community and Economic Development Department for long range planning reimbursement prior to approval by staff of the final map.
72. If the subdivider elects to file multiple final maps, then prior to submittal of the first final map for the project, the applicant shall submit a development schedule of phasing and improvements for review and approval by the engineering and planning divisions of the town. The Town may impose additional conditions relative to phasing and the filing of multiple maps in accordance with Section 66456.1 of the Subdivision Map

Act. Phasing may only be permitted if discontinuous right-of-ways and substandard lots are not created by the phasing.

THE FOLLOWING CONDITIONS SHALL BE COMPLETED PRIOR TO ISSUANCE OF AN ENCROACHMENT, GRADING OR IMPROVEMENT PERMIT:

73. Construction of water and sewer improvements shall require water and sewer permits from the Mammoth Community Water District. Grading plans shall be submitted to the Town for review and approval and a grading permit in accordance with the municipal code shall be obtained from the Town and all mitigating measures and best management practices to prevent erosion and to protect existing trees shall be constructed prior to work commencing for any and all water and sewer improvements.
74. An application for a grading permit shall be submitted to the Engineering Services Division of the Public Works Department in accordance Chapter 12.08 of the municipal code. No change to the existing conditions of the site, including site grading, drainage interruption, land clearing, etc. shall be commenced until an engineered grading, drainage and landscape/irrigation plans have been approved by the Public Works Director.
75. A grading permit for the project shall not be issued prior to approval of the landscaping and irrigation plans per Municipal Code 17.40.
76. An encroachment permit or a letter of exemption shall be obtained from the Engineering Services Division of the Town prior to construction within the public right of way in accordance Chapter 12.04 of the Municipal Code.
77. No work within Town right of way shall be commenced until a traffic control plan has been approved by the engineering services division of the Town.
78. Street and public improvement plans for streets, sidewalks, drainage, and other public/private infrastructure shall be prepared by a registered civil engineer and submitted to the Town for review and approval. Existing topography and proposed grading with sufficient contours intervals (not to exceed two feet) shall be prepared by a registered civil engineer or a licensed land surveyor.
79. Street profile grades shall not be less than 0.5% unless the engineer of work at the time of submittal of the improvement plans provides justification to the satisfaction of the Public Works Director confirming the adequacy of the grade and provided that drainage can be adequately maintained.
80. Final grading and improvement plans and profiles shall indicate the location of any existing utility facility that would affect construction. All existing utilities shall be shown on the improvement plans and relocated as necessary without cost to the Town. Existing overhead utilities requiring relocation shall be converted to underground.
81. Prior to approval of the improvement plans, the applicant shall contract with a soils testing engineer. Any proposed grading within the street right-of-way shall be done under the

direction of the soils testing engineer. Compaction tests of embankment construction, trench backfill, and all sub-grades shall be performed at no cost to the Town. Prior to placement of any base materials, and/or paving, a written report shall be submitted by the soils testing engineer to the Public Works Director for review and approval.

82. A geotechnical report is required that confirms that the proposed infiltrator locations will not be subject to groundwater entering the drywell or cause leaching through an adjacent slope face. A sediment and oil water separator shall be installed in conjunction with the infiltrator, substantially in conformance with water quality Phase 2 requirements.
83. Slope stability tests are required for all cuts greater than 2:1 or fills greater than 3:1 (H:V).
84. A thorough evaluation of the structural street section, to include parkway improvements, from a qualified civil and/or geotechnical engineer, shall be submitted to the engineering services division.
85. All driveways shall be constructed in accordance with the driveway standards of the Town.
86. In addition to the drainage, traffic related, or other requirements stated herein, other "on-site" or "off-site" improvements may be required which cannot be determined from tentative plans at this time and would have to be reviewed after more complete improvement plans and profiles have been submitted to the Public Works Director.
87. Drainage across the property shall be maintained. The design of the grading and drainage facilities shall not create concentrated discharges to adjacent properties and/or public rights of way in excess of historical flows. A registered civil engineer shall investigate existing facilities and design adequate drainage facilities to intercept and conduct the drainage flows around or through the site in a manner that will not adversely affect adjacent or downstream properties. The Engineer shall verify that downstream facilities, and drainage channels accepting site flows are not adversely affected by an increase in runoff from this development. If the project does create concentrated or sheet flows off-site that are greater than historical, the applicant shall demonstrate that the downstream facilities can accommodate the increased flows; otherwise, the applicant shall provide on-site detention for excess flows.
88. A final hydrology and hydraulics study is required and shall be submitted with the grading and improvement plans for the project. The study shall be prepared in accordance with the grading chapter of the municipal code and the adopted Storm Drain Master Plan of the Town and shall be prepared by a registered civil engineer. The study shall include runoff from the entire site and shall also include runoff that enters the property from all upstream sources, and shall include all storm drains, drywells, infiltrators and surface flows. The study shall indicate the method of conveying surface and underground runoff and shall address drainage conveyances downstream to the extent they exit to an existing facility or natural drainage course. All existing drainage facilities on-site and tributary to the site shall be identified and shown on the grading plans. The hydraulic calculations shall include all pipe flows, velocities and head loss calculations sufficient to show the adequacy of all conveyance systems. Q100 and

V100 and the hydraulic grade line for all public storm drains and all facilities with an equivalent diameter of 18 inches or greater shall be shown on the approved grading and improvement plans. The drainage study for the project and the final design of the storm drain system shall be approved prior to approval by staff of the grading and improvement plans and the final map. Infiltrators and storm water pollution prevention facilities are to be designed to accept the "first flush" levels of runoff. The capacity of these facilities shall not be assumed to reduce storm water flows of other drainage facilities that may be required for the project.

89. Temporary and permanent erosion control plans shall be included with the grading, improvement, and building plans. Continuous water spraying or other approved methods shall be used during grading operations to control fugitive dust. Drop inlet filters and other temporary Best Management Practices shall be employed to filter nuisance water from storm drain inlets affected by construction, on-site and off-site. Groundwater pollution from urban run-off water generated by the project shall be mitigated using best management practices (BMPs), per the requirements of the California Regional Water Quality Control Board, Lahontan District, and as indicated in the "New Development and Redevelopment Guidelines". The applicant shall apply for and obtain all required permits, written clearances or exemptions from the Lahontan District prior to any grading. All BMPs shall be shown on the erosion control plans. If the Town inspector determines that the BMPs in place are not adequate, then additional BMPs shall be installed at the discretion of the Town inspector or a revised erosion control plan shall be prepared for approval by the engineering services division. Gravel bags shall be used in lieu of sand bags. All permanent erosion control measures shall be irrigated for at least one season. Permanent BMPs shall include sediment traps upstream of infiltrators and oil water separators for parking areas consistent with the General Plan.
90. A Construction Staging and Management Plan shall be submitted to, and approved by the Public Works Director prior to grading or building permit issuance. Said plan shall include provisions related to the parking of construction worker vehicles, construction equipment, construction materials, and specific limitations restricting access into non-developed portions of the site and the storage of materials within these areas. The staging plan and the final access roadway improvements shall all be approved by the Mammoth Lakes Fire Protection District prior to grading permit issuance. An approved copy of the plan shall be maintained on-site at all times and available to all contractors, subcontractors, their employees and the Town. The staging plan shall address hours of work, special approval for work outside hours allowed. The plan shall also contain provisions for interrupting utility services to neighboring properties and sufficient noticing to affected residents and property owners.
91. On the cover sheet of the grading plans and in a very conspicuous location place the following note: "The conditions of approval for the approved tentative tract map, TTM 15-001, VAR 15-001, UPA 15-001, DR 15-001, and ADJ 15-001, contained in the resolution recorded at the County Recorder's Office of Mono County as Document No. 2015xxxxx, shall be made a part of these plans and the grading permit and all conditions and requirements therein shall be adhered to by the contractor, his sub-contractors and any person performing any work on the project." This note shall also be included within the construction staging and management plan.

92. Prior to combustible materials being placed on-site, an all-weather access road shall be constructed serving all exterior portions of the structure to the satisfaction of MLFPD.
93. A shoring plan shall be prepared and submitted for review that demonstrates how the cuts along and adjacent to the property lines can be made without encroachment onto the adjacent property and in conformance with OSHA requirements.
94. Existing Town streets that require construction or reconstruction, shall remain open for traffic at all times, with adequate detours and traffic control, during actual construction. A form of security listed in Government Code Section 66499(a) and acceptable to the Town shall be posted to cover the cost of grading and paving prior to approval by staff of the map.
95. The grading plan and building permit plans shall indicate all snow storage areas and drainage facilities.
96. All easements shall be shown on the grading and building permit plans.
97. All export shall be taken to, and all import shall be taken from a permitted site, which shall be identified at grading permit issuance. The applicant shall prepare a haul route, subject to the approval of the Public Works Director prior to the import or export of material for the site.
98. A tree removal plan shall be approved prior to any land disturbance and the issuance of a grading or building permit. A pre-construction meeting shall be held on-site prior to any land disturbance to inspect clearing limit fencing. The applicant shall obtain the necessary Timber Harvest Permit prior to any tree removal.
99. The grading plan shall include tree protection measures to address how construction can occur without disturbing the drip-line of retained trees. The drip-line areas shall be "fenced" off with barriers to prevent disturbance during site grading. Additionally, finish grading shall not disturb existing understory vegetation or retained trees. Grading operations shall not commence until all erosion control measures and tree protection measures are in place as shown on the approved plans, and as required by the Town.

THE FOLLOWING CONDITIONS SHALL BE COMPLETED PRIOR TO ISSUANCE OF BUILDING PERMITS:

100. For all retaining and screening walls, the applicant shall submit plans to and obtain a building permit from the building division.

PRIOR TO THE ISSUANCE OF THE FIRST TEMPORARY, CONDITIONAL OR FINAL CERTIFICATE OF OCCUPANCY THE FOLLOWING CONDITIONS SHALL BE COMPLETED:

101. All required landscaping and irrigation improvements shall be constructed prior to the first temporary, conditional or final certificate of occupancy for the project. A form of security listed in Government Code Section 66499(a) and acceptable to the Town shall be posted with the Town to the satisfaction of the Community and Economic Development

Department for any required landscaping and irrigation improvements to be deferred and a schedule shall be submitted to the town for the construction of the deferred improvements. Deferral of the construction of any landscaping and irrigation improvements shall be at the sole discretion of the director of the Community and Economic Development Department.

102. Address numbers shall be placed on all new and existing structures in such a manner as to be plainly visible and legible from the access roadway or street, consistent with Municipal Code Chapter 16.32.
103. The final condominium plans for the project shall be submitted to the Town for review for conformance with the approved development plan, tentative map, use permit and CC&Rs. The condominium plans shall conform to the conditions of approval with respect to ownership of required appurtenant use areas. Issuance of the first certificate of occupancy and recordation of the condominium plans shall not occur prior to Town approval of the condominium plans. The condominium plans shall be recorded prior to issuance of the first temporary, conditional or final certificate of occupancy for the project.
104. Construction of private streets and private facilities and related drainage improvements shall be inspected and certified by the Public Works Director and/or designee.
105. All required grading, public and private street and drainage improvements shall be completed, all "punchlist" items completed to the satisfaction of the Public Works Director, the as-built plans submitted, reviewed and approved and the required warranty security posted prior the issuance of the first certificate of occupancy for the project.
106. Projects subject to a building permit shall have all required on and off-site improvements completed and approved prior to final inspection of any buildings or structures. The installation of any on or off-site improvements shall be sufficiently completed so as to assure protection from storm or drainage run off, a safe and drivable access for fire and safety, and the ordinary and intended use of buildings or structures. The Building Official, with the concurrence of the Public Works Director, may approve any plan or approve a change to an approved plan, which complies with the intent of this policy.
107. All deferred survey monumentation shall be completed, or surety posted, prior to the issuance of the first temporary, conditional or final certificate of occupancy for the project.

SPECIAL ENGINEERING CONDITIONS

108. Since the project would disturb more than one acre, a National Pollutant Discharge Elimination System (NPDES) permit is required. The NPDES permit shall be approved by the State Water Resources Control Board and Waste Discharger Identification (WDID) number issued prior to the issuance of a Town grading permit.
109. Prior to the issuance of building permits one of the following shall be completed:

- a. Recordation of the final map. The applicant shall provide evidence to the Town that the map has recorded prior to issuance of the first building permit for the project. Evidence shall consist of the recording information of the final map; or
 - b. If a building permit is issued prior to the recordation of the final map, the project shall be considered an apartment development under one ownership to comply with State Subdivision Map Act unless and until the final map is recorded. Under this scenario, no certificate of occupancy may be issued and no sale or offer for sale of the units may be made by the owner until a final map is recorded.
110. The final alignment of the pedestrian path shall reflect the updating circulation and parking plan for the Canyon Lodge parking lot. The final alignment shall comply with applicable setback requirements. The final alignment shall be reviewed and approved by the Public Works Director and the Community and Economic Development Director prior to the issuance of a grading permit for the pedestrian path.
